## FOR MEN AND WOMEN.

Basket Ball as Played in Y. M. C. A. Gymnasium.

A game for which there is something like football, but the ball is thrown and the players are not allowed to touch it.

For a long time gymnasium instruction was confined by the necessity of a game which could be played indoors by old and young, male and female. They wanted a game devoid of rough features, yet one which should be thoroughly scientific, and which should afford plenty of opportunity for good health exercise for the scholar or business man, and training for the athlete.

Such a game, however, was not to be found in the country. The game of basketball, which has been discovered in the country, has equal advantage with us in buying.
